## EMERGING RISKS

Risk Profile Management is crucial in the successful administration of a professional services organization. Understanding your unique risk profile score and how it is impacted by multiple factors, including emerging trends like those above, is the first step in developing the Risk Profile Management Program.

The goal of a risk profile is to provide an unbiased understanding of your organization's ability to address risk by assigning a score to different types of risks and the danger they pose. By staying on top of potential threats, we can help you plan and control for emerging risks through documented and measured strategies.

***One of the most important factors to consider when managing your property liability coverage for professional services is the true cost of risk, not the price of the premium.***
